

HE-MUWL-WA

## Instructions

- 1) Attach suction cup bracket to the light using the included hardware.
  - 2) Clean the windshield thoroughly and dry. Then press the light into place using the suction cups. Adjust the angle so that the light guard is flush with the windshield.
  - 3) Run cable through vehicle avoiding pinch points.
  - 4) Connect power:
    - a) Plug power adapter into a 12VDC port.
    - b) Hardwire:
      - i) Cut off power adapter from cable.
      - ii) Connect red wire to a latched switch, +12VDC (*Fuse @10a*)
      - iii) Connect black wire to chassis ground
      - iv) Connect yellow wire to a momentary switch, chassis ground
- \*Hardwire switches sold separately*

## Operation

### Latched Switch:

Turns controller on and off.  
Will resume last flash pattern.

### Momentary Switch:

Each press of the switch will cycle the light to the next of the 16 patterns.
