

Active Noise Canceling Bypass Harness (32 Pin)

Fits Select Ford/Lincoln Models 2020-2024

- 32-pin Active Noise Canceling Bypass Harness
- Fits Ford vehicles with ANC audio systems
- Enhances sound quality during audio system upgrades
- Eliminates unwanted ANC interference for complete sound customization
- Protects vehicle electronics
- Quality connectors
- Always check vehicle warranty before altering the audio system to prevent voiding coverage

KIT COMPONENTS

- ANC-FDH3 Wiring Harness

APPLICATIONS Amplified with Active Noise Canceling Module

Ford

| | |
|---------------------------------------|-----------|
| Escape (Amplified models)..... | 2020-2023 |
| Expedition (All trims)..... | 2022-2023 |
| Explorer (With SYNC)..... | 2020-2023 |
| Mustang (9 & 12 speaker system) | 2024 |

Lincoln

| | |
|----------------------------|-----------|
| Aviator (All trims)..... | 2020-2023 |
| Corsair (All trims)..... | 2020-2023 |
| Navigator(All trims) | 2022-2023 |

Visit [AxxessInterfaces.com](https://www.AxxessInterfaces.com) for more detailed information about the product and up-to-date vehicle specific applications

TOOLS REQUIRED

- Crimping tool and connectors, or solder gun, solder, and heat shrink
- Tape
- Wire cutter
- Zip-ties

RECOMMENDED

- Digital Multi-meter
- Test Tones

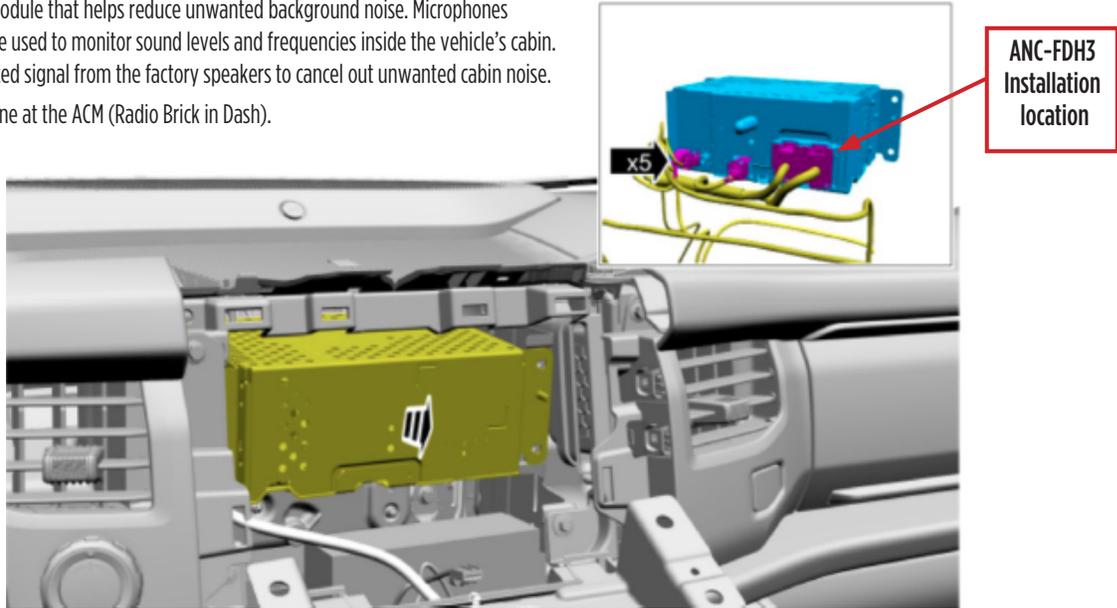

ATTENTION: With the key out of the ignition, disconnect the negative battery terminal before installing this product. Ensure that all installation connections, especially the air bag indicator lights, are plugged in before reconnecting the battery or cycling the ignition to test this product. **NOTE:** Refer also to the instructions included with the aftermarket accessory before installing this device.

ACTIVE NOISE CANCELING MODULE LOCATION

Active Noise Canceling Microphones (ANC) is an audio system feature that reduces the level of occasional low frequency engine noises which compete with audio system playback. The system uses 3 microphones, the ACM and the audio system speakers.

IMPORTANT NOTE: DO NOT plug the ANC bypass into any factory module other than the location mentioned below.

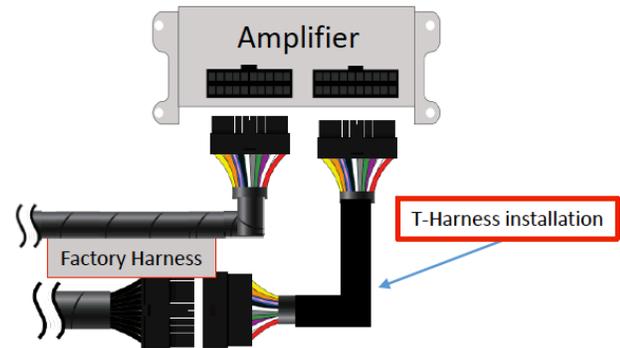

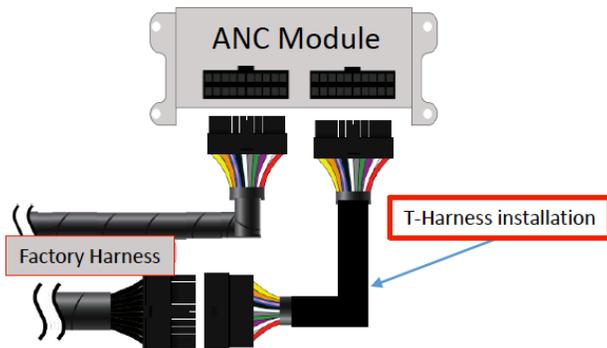

Active Noise Cancellation is an OE module that helps reduce unwanted background noise. Microphones mounted throughout the vehicles are used to monitor sound levels and frequencies inside the vehicle's cabin. The factory ANC generates an inverted signal from the factory speakers to cancel out unwanted cabin noise. The installation of this harness is done at the ACM (Radio Brick in Dash).

BYPASSING ACTIVE NOISE CANCELING (ANC)

Bypassing ANC

NOTE: In some amplified vehicles the ANC module is inside the factory amplifier(s)

ANC-FDH3
