

## Active Noise Canceling Bypass Harness Fits Cadillac CT6 (with Bose) Models 2016-2020

Visit [AxxessInterfaces.com](http://AxxessInterfaces.com) for more detailed information about the product and up-to-date vehicle specific applications

- Active noise canceling bypass harness
- Fits non-amplified GM vehicles with ANC audio systems, in a variety of RPOs
- Enhances sound quality during audio system upgrades
- Eliminates unwanted ANC interference for complete sound customization
- Protects vehicle electronics
- Always check vehicle warranty before altering the audio system to prevent voiding coverage

This **Active Noise Canceling Bypass Harness** is an OE module that helps reduce unwanted background noise. Microphones mounted throughout the vehicles are used to monitor sound levels and frequencies inside the vehicle's cabin. The factory ANC generates an inverted signal from the factory speakers to cancel out unwanted cabin noise.

It is recommended that the RPO code is double check to confirm application. The RPO Codes can be found on a placard labeled “**Service Parts Identification**” in the glove box, on the trunk floor or inside the driver’s door panel.
