- Connect the White wire to the left front positive speaker output of the aftermarket radio.

Note: This harness must be used in conjunction with the AX-ADXSVI
After the XSVI is initialized, plug in the ASWC-1 into the 12-pin harness of the aftermarket radio.

Connect the **White/Black** wire to the left front negative speaker output of the aftermarket radio.

Connect the **Gray** wire to the right front positive speaker output of the aftermarket radio.

Connect the **Gray/Black** wire to the right front negative speaker output of the aftermarket radio.

Connect the **Green** wire to the radio’s left rear positive speaker output.

Connect the **Green/Black** wire to the radio’s left rear negative speaker output.

Connect the **Purple** wire to the radio’s right rear positive speaker output.

Connect the **Purple/Black** wire to the radio’s right rear negative speaker output.

The following wires are for the aftermarket radios that have navigation built in.

Connect the **Light Green** wire to the parking brake wire of the aftermarket navigation radio (if applicable).

Connect the **Blue/Pink** wire to the VSS or speed sense wire of the aftermarket navigation radio (if applicable).

Connect the **Green/Purple** wire to the reverse wire of the aftermarket navigation radio (if applicable).

Cycle the key, by turning the ignition on for 30 seconds. Then off and on again to test the radio.

**ASWC-1 (if installing)**

After the XSVI is initialized, plug in the ASWC-1 into the 12-pin harness of the AX-ADXSVI-CH1 and refer to the ASWC-1 instructions.

**Caution:** Metra recommends disconnecting the negative battery terminal before beginning any installation. All accessories, switches, and especially air bag indicator lights must be plugged in before reconnecting the battery or cycling the ignition.

**Note:** Refer to the instructions included with the aftermarket radio.
