### TOOLS REQUIRED
- Crimping tool and connectors, or solder gun, solder, and heat shrink
- Tape
- Wire cutter
- Zip ties
Connections & Installation

- Unplug the main harness from port “A” in the touchscreen display, then connect the AXA2B-FD1 harness in between.
- Connect the AXA2B-FD1 harness to the AXA2B-FD1 interface.
- Connect the Gray (right) and White (left) RCA jacks to the front full range outputs from the aftermarket radio.
- Connect the Blue/White wire from the AXA2B-FD1 harness to amp turn-on.
- Tape off and disregard the Blue/Red wire.

Testing

- Cycle the ignition on and test the installation for functionality.
  Note: Fade control will be lost.
- Locate the amp gain between the two connectors. Adjust the gain as needed to balance the level between the woofers and tweeters.
- If the level isn’t the same from all speakers, follow the instructions below to correct the issue.
- Cut the RCA jacks off to expose the speaker wires inside.
- Connect the following wires to the front speaker outputs from the aftermarket radio:
  - Gray: Right +
  - Gray/Black: Right -
  - White: Left +
  - White/Black: Left -
