

GM Data Interface with SWC 2006-2012

INTERFACE FEATURES

- Provides retained accessory power (10-amp)
- Provides illumination, parking brake, reverse, and speed sense outputs
- Retains warning chimes through an onboard speaker
- Retains audio controls on the steering wheel
- Designed to be compatible with all major radio brands
- Auto detects vehicle type, radio connection, and preset controls
- Ability to dual assign steering wheel control buttons
- Retains memory settings even after battery disconnection or interface removal (non volatile memory)
- Designed for non-amplified models, or when bypassing a factory amplifier
- Retains balance and fade
- Micro-B USB updatable

APPLICATIONS

Chevrolet		Pontiac		Saturn	
Cobalt	2007-2010	G5	2007-2009	Aura	2007-2009
HHR	2006-2011	G6 (1)	2009	Sky	2007-2009
Malibu	2008-2012	G6	2010		
		Solstice	2006-2009		

(1) 5th digit of VIN must be a J, K, or L

INTERFACE COMPONENTS

- AXTC-LN11 interface
- AXTC-LN11 harness
- 3.5mm adapter

TOOLS & INSTALLATION ACCESSORIES REQUIRED

- Crimping tool and connectors, or solder gun, solder, and heat shrink
- Tape
- Wire cutter
- Zip ties

Product Info

CONNECTIONS

PROGRAMMING

1.  Open the driver's door, and keep open during the programming process.

2.  Cycle the ignition on.

3.  Connect the **AXTC-LN11 harness** to the **AXTC-LN11 interface**, and then to the wiring harness in the vehicle.

4.  Hold **Volume Up**. Locate the **Volume Up** button on the the steering wheel. Program the interface by pressing and holding the **Volume Up** button until the LED stops flashing.

5.  The LED will flash **Green & Red** while the interface programs the radio to the steering wheel controls. Once programmed, the LED will go out, then produce a pattern which will identify the radio type installed. Refer to the **Radio LED Feedback** section under **Troubleshooting** for radio types.

6.  The LED will go out, then once again quickly flash **Green & Red** while the interface programs itself to the vehicle. Once programmed, the LED will go out again, then turn solid **Green**.

7.  **Press:**
Vol Up, Seek Up,
Vol Up, PTT/Mute,
Vol Up
Press the following buttons on the steering wheel in the exact sequence shown. For each button press the LED will turn on momentarily. If a button is not present, press **Volume Up** to skip that button. The LED will turn solid **Green** after the last button has been pressed.

• **Volume Up** • **Seek Up** • **Volume Up** • **PTT (OnStar) or MUTE** • **Volume Up**

8.  Cycle the ignition off, then back on.

9.  Test all functions of the installation for proper operation.

TROUBLESHOOTING

1. If the interface fails to function, press and release the reset button, then repeat the programming process from step 4 to try again.

2. **Final LED Feedback**

At the end of programming the LED will turn **Solid Green** which indicates programming was successful. If the LED didn't turn **Solid Green**, reference the list below to understand which programming section the problem may stem from.

LED Light	Radio Programming Section	Vehicle Programming Section
Solid Green	Pass	Pass
Slow Red Flash	Fail	Pass
Slow Green Flash	Pass	Fail
Solid Red	Fail	Fail

Note: If the LED shows **Solid Green** for **Pass** (indicating everything programmed correctly), yet the steering wheel controls don't work, make sure that the 3.5mm jack is plugged in, and plugged into the correct jack in the radio. Once corrected, press the reset button, then program again.
