- (1) For 2013-2015 models equipped with NAV use: **AXTC-LN44.**
 (2) For 2012-Up models equipped with NAV use: **AXTC-LN44.**
 (3) These vehicles are standard for an amp and must be bypassed.

CONNECTIONS

3.5mm Adapter (for radios with a wire for SWC)

- Boss (with SWC wire):** Key 1 (Gray) - Brown
- Kenwood / JVC (with SWC wire):** Blue/Yellow - Brown
- XITE:** SWC-2 - Brown
- Universal Radio*:** Key-A or SWC-1 - Brown
- Key-B or SWC-2 - Brown/White

* After programming, assign SWC buttons within radio menu

PROGRAMMING

- 

1. Open the driver's door, and keep open during the programming process.
- 

2. Cycle the ignition on.
- 

3. Connect the **AXTC-LN29 harness** to the **AXTC-LN29 interface**, and then to the wiring harness in the vehicle.
- 

4. Tap **Volume Up**. Locate the **Volume Up** button on the the steering wheel. Program the interface by tapping the **Volume Up** button until the LED stops flashing.
- 

5. The LED will flash **Green & Red** while the interface programs the radio to the steering wheel controls. Once programmed, the LED will go out, then produce a pattern which will identify the radio type installed. Refer to the **Radio LED Feedback** section under **Troubleshooting** for radio types.
- 

6. The LED will go out, then once again quickly flash **Green & Red** while the interface programs itself to the vehicle. Once programmed, the LED will go out again, then turn solid **Green**.
- 

7. Cycle the ignition off, then back on.
- 

8. Test all functions of the installation for proper operation.

TROUBLESHOOTING

1. If the interface fails to function, press and release the reset button, then repeat the programming process from step 4 to try again.

2. **Final LED Feedback**

At the end of programming the LED will turn **Solid Green** which indicates programming was successful. If the LED didn't turn **Solid Green**, reference the list below to understand which programming section the problem may stem from.

| LED Light | Radio Programming Section | Vehicle Programming Section |
|------------------|---------------------------|-----------------------------|
| Solid Green | Pass | Pass |
| Slow Red Flash | Fail | Pass |
| Slow Green Flash | Pass | Fail |
| Solid Red | Fail | Fail |

Note: If the LED shows **Solid Green** for **Pass** (indicating everything programmed correctly), yet the steering wheel controls don't work, make sure that the 3.5mm jack is plugged in, and plugged into the correct jack in the radio. Once corrected, press the reset button, then program again.
