Volkswagen SWC (Steering Wheel Control) and Data Interface 2015-up

INTERFACE FEATURES

• Provides accessory power (10-amp)
• Provides wires for multimedia radios (park brake, reverse, speed sense)
• Designed for non-amplified models only
• Retains audio controls on the steering wheel
• Designed to be compatible with all major radio brands
• Auto detects vehicle type, radio connection, and preset controls
• Ability to dual assign steering wheel control buttons
• Retains memory settings even after battery disconnection or interface removal (non volatile memory)
• Provides illumination output
• Retains the factory backup camera
• Micro-B USB updatable

APPLICATIONS

Volkswagen

Beetle 2016-2019
Golf Series 2015-up
Jetta 2016-2018
Jetta GLI 2016-2018
Passat 2016-up
Tiguan 2016-2017

TABLE OF CONTENTS

Connections ........................................................................2

INTERFACE COMPONENTS

• AXTC-VW2 interface
• AXTC-VW2 harness
• 3.5mm adapter

TOOLS & INSTALLATION ACCESSORIES REQUIRED

• Crimping tool and connectors, or solder gun, solder, and heat shrink
• Tape
• Wire cutter
• Zip ties

CONNECTIONS

Vehicle Connector

Aftermarket Radio (radio’s features may vary)

3.5mm Adapter (for radios with a wire for SWC)

- Boss (with SWC wire): Key 1 (Gray) - Brown
- Kenwood / JVC (with SWC wire): Blue/Yellow - Brown
- XITE: SWC-2 - Brown
- Universal Radio*: Key-A or SWC-1 - Brown
  * Key-B or SWC-2 - Brown/White

* After programming, assign SWC buttons within radio menu

Radio Connections

- Black - Ground
- Yellow - Battery power
- Red - Accessory power
- Orange - Illumination
- Blue/White - Amp turn-on
- Blue/Pink - VSS/Speed-Sense
- Green/Purple - Reverse signal
- Light Green - Parking brake
- Gray - Front right speaker +
- Gray/Black - Front right speaker -
- White - Front left speaker +
- White/Black - Front left speaker -
- Green - Rear left speaker +
- Green/Black - Rear left speaker -
- Purple - Rear right speaker +
- Purple/Black - Rear right speaker -
Open the driver’s door, and keep open during the programming process.

Cycle the ignition on.

Connect the AXTC-VW2 harness to the AXTC-VW2 interface, and then to the wiring harness in the vehicle.

Locate the Volume Up button on the steering wheel. Program the interface by tapping the Volume Up button at a heartbeat pace until the LED light stops flashing.

The LED light will flash Green & Red while the interface programs the radio to the steering wheel controls. Once programmed, the LED light will go out, then produce a pattern which will identify the radio type installed. Refer to the Radio LED Feedback section under Troubleshooting for radio types.

The LED light will go out, then once again quickly flash Green & Red while the interface programs itself to the vehicle. Once programmed, the LED light will go out again, then turn solid Green.

Cycle the ignition off, then back on.

Test all functions of the installation for proper operation.

Note: Audio Mode must be selected in the MFI menu to allow track up and down to function. Refer to the vehicle owner’s manual for more information.
**TROUBLESHOOTING**

1. If the interface fails to function, press and release the reset button, then repeat the programming process from step 4 to try again.

2. **Final LED Feedback**
   
   At the end of programming the LED light will turn **Solid Green** which indicates programming was successful. If the LED light didn’t turn **Solid Green**, reference the list below to understand which programming section the problem may stem from.

<table>
<thead>
<tr>
<th>LED Light</th>
<th>Radio Programming Section</th>
<th>Vehicle Programming Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid Green</td>
<td>Pass</td>
<td>Pass</td>
</tr>
<tr>
<td>Slow Red Flash</td>
<td>Fail</td>
<td>Pass</td>
</tr>
<tr>
<td>Slow Green Flash</td>
<td>Pass</td>
<td>Fail</td>
</tr>
<tr>
<td>Solid Red</td>
<td>Fail</td>
<td>Fail</td>
</tr>
</tbody>
</table>

**Note:** If the LED light shows **Solid Green** for **Pass** (indicating everything programmed correctly), yet the steering wheel controls don’t work, check to ensure that the 3.5mm jack is plugged in, and also plugged into the correct jack on the radio. Once corrected, press the reset button, then program again.
