Mercedes accessory and NAV output CAN Interface 2001-2004

- Provides accessory (12 volt 10 amp)
- Retains R.A.P. (retained accessory power)
- Used in non-amplified systems, or when replacing amplified system
- Provides NAV outputs (parking brake, reverse, and V.S.S.)
- Prewired AXSWC harness included (AXSWC sold separately)
- High level speaker input
- USB updatable

Mercedes accessory and NAV output CAN Interface 2001-2004

- Provides accessory (12 volt 10 amp)
- Retains R.A.P. (retained accessory power)
- Used in non-amplified systems, or when replacing amplified system
- Provides NAV outputs (parking brake, reverse, and V.S.S.)
- Prewired AXSWC harness included (AXSWC sold separately)

Connect the Gray wire to the right front positive speaker output of the aftermarket radio.

Connect the Gray/Black wire to the right front negative speaker output of the aftermarket radio.

Connect the Green wire to the radio’s left rear positive speaker output.

Connect the Green/Black wire to the radio’s left rear negative speaker output.

Connect the Purple wire to the radio’s right rear positive speaker output.

Connect the Purple/Black wire to the radio’s right rear negative speaker output.

The following wires are for the aftermarket radios that have navigation built in.

Connect the Light Green wire to the parking brake wire of the aftermarket navigation radio (if applicable).

Connect the Blue/Pink wire to the VSS or speed sense wire of the aftermarket navigation radio (if applicable).

Connect the Green/Purple wire to the reverse wire of the aftermarket navigation radio (if applicable).

Cycle the key, by turning the ignition on for 30 seconds. Then off and on again to test the radio.

**AXSWC (if installing)**

After the interface is initialized, plug in the AXSWC into the 12-pin harness of the AXVI-1785 and refer to the AXSWC instructions.

**Caution:** Metra recommends disconnecting the negative battery terminal before beginning any installation. All accessories, switches, and especially air bag indicator lights must be plugged in before reconnecting the battery or cycling the ignition.

*Note:* Refer to the instructions included with the aftermarket radio.

---

Connect the Gray wire to the right front positive speaker output of the aftermarket radio.

Connect the Gray/Black wire to the right front negative speaker output of the aftermarket radio.

Connect the Green wire to the radio’s left rear positive speaker output.

Connect the Green/Black wire to the radio’s left rear negative speaker output.

Connect the Purple wire to the radio’s right rear positive speaker output.

Connect the Purple/Black wire to the radio’s right rear negative speaker output.

The following wires are for the aftermarket radios that have navigation built in.

Connect the Light Green wire to the parking brake wire of the aftermarket navigation radio (if applicable).

Connect the Blue/Pink wire to the VSS or speed sense wire of the aftermarket navigation radio (if applicable).

Connect the Green/Purple wire to the reverse wire of the aftermarket navigation radio (if applicable).
