

THE INSTALLER'S CHOICE

JP-JKWIP

Whip mounting bracket

Application: Jeep JK 2007-2018 (Excluding JL model)

Instructions:

1. Start by removing the spare tire. This will allow access to the area needed for the installation of this bracket.
2. Remove two bolts located on the top passenger side of the carrier, that attach the spare wheel carrier to the vehicle.
3. Align the holes of the whip bracket to the holes on the spare wheel carrier. Reinstall the two previously removed bolts, securing the whip bracket and spare wheel carrier to the vehicle .
4. Install whip (not included) to the bracket in accordance with the whip's instructions.
5. After completing and testing the whip, reinstall the spare tire.
