

Polaris General 2016-Up

Visit MetraOnline.com for more detailed information about the product and up-to-date vehicle specific applications

KIT FEATURES

- ISO DDIN radio provision
- Replaces upper pocket
- Textured to match factory finish

KIT COMPONENTS

- A) Radio housing • B) Radio brackets • C) Phillips screws (12)

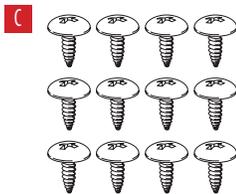

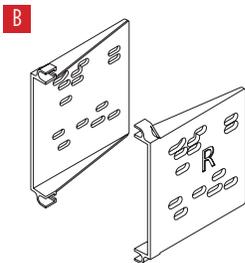

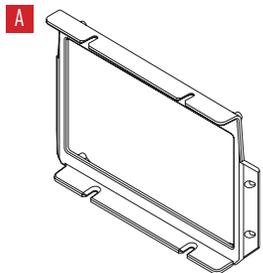

TABLE OF CONTENTS

Dash Disassembly	2
Kit Preparation	2
Kit Assembly	3

TOOLS REQUIRED

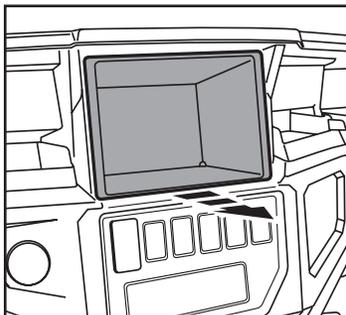

- Panel removal tool • Phillips screwdriver
- 1/8" drill bit

Attention! Let the vehicle sit with the key out of the ignition for a few minutes before removing the factory radio. When testing the aftermarket equipment, ensure that all factory equipment is connected before cycling the key to ignition.

DASH DISASSEMBLY

1. Remove the storage pocket from the upper dashboard. (Figure A)

Continue to Kit Preparation

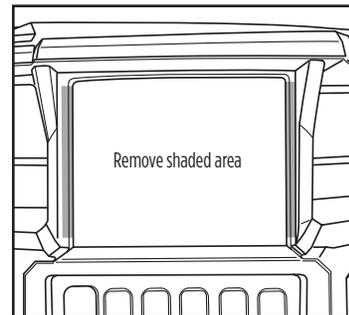

(Figure A)

KIT PREPARATION

1. Enlarge the storage pocket opening to allow room for the aftermarket radio and mounting kit. (Figure A)

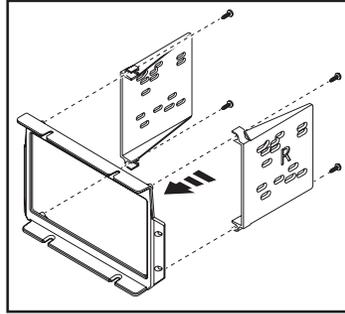

Continue to Kit Assembly

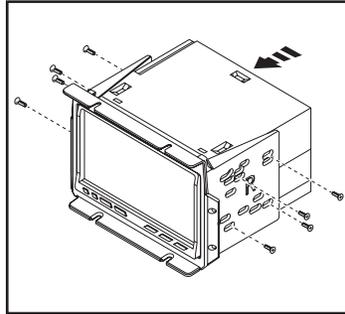

(Figure A)

KIT ASSEMBLY

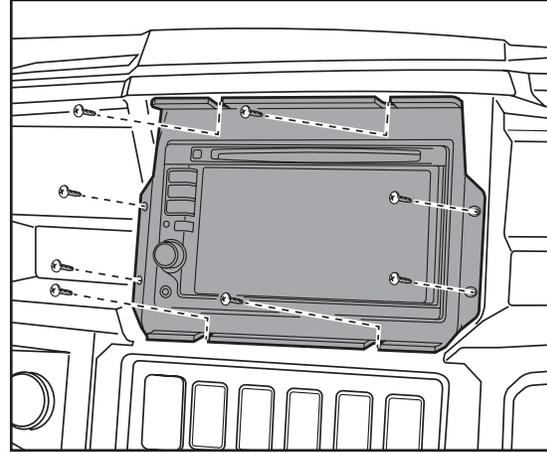

1. Secure the **radio brackets** to the **radio housing** using (4) Phillips screws provided. (Figure A)
2. Slide the radio into the radio housing assembly, then secure using screws supplied with the radio. (Figure B)
3. Complete all necessary connections to the radio, then test the radio for proper operation. Use Metra part number 44-UA20 (sold separately) for an antenna.
4. Slide the radio assembly into the dash. Pre-drill (8) pilot holes in the dash using a 1/8" drill bit. Using a manual screwdriver, secure the radio assembly to the dash using (8) Phillips screws provided. Do not overtighten! (Figure C)
