

ONE YEAR LIMITED WARRANTY

Metra Electronics Corporation warrants the original owner that this product will be free of defects in material or workmanship for the period of one year from the date of original purchase, if (i) the allegedly defective product has not been abused, misused or improperly maintained and/or repaired during the warranty period, (ii) the defect is not caused by flooding, fire, explosion, earthquakes or similar phenomenon, and (iii) the defect is not caused by improper use. In order to obtain warranty service, contact your Metra Powersports Authorized Retailer.

Metra Electronics Corporation will, at its option, repair or replace the product free of charge.

To the full extent allowed by law, Metra Electronics Corporation excludes and disclaims liability, whether based in contract or tort (including negligence for any consequential, indirect incidental or special damages of any nature arising out of the sale, maintenance, use or failure of this product, even if Metra Electronics Corporation has been advised of the possibility of such damages in advance, and Metra Electronics Corporation limits its liability to replacement, repair or refund of the purchase price paid, at Metra's option.)

Some states do not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation on implied warranty and incidental or consequential damages may not apply to you. This warranty gives you specific legal rights. You may have other rights, which vary from state to state.

POWERSPORTS CAN SPEAKERS

USER MANUAL

METRA POWERSPORT SPEAKERS

Looking forward to fun and good sound?

Thanks for purchasing Metra Powersports Speakers for your system. For over 70 years Metra has been bringing great designed and engineered audio products to life. We hope that the addition of these speakers to your audio system bring you a lot of enjoyment.

Metra speakers are designed and engineered in the USA to reproduce great sound quality for extreme environments. We highly recommend that your new speakers be installed by an authorized Metra Powersports dealer.

If you decide to install the speakers by yourself, please thoroughly read through this manual before getting started so you make the process successful. This manual will familiarize you with the speakers and how best to install them and guide you through the proper installation process and procedures.

Please contact your authorized Metra Powersports dealer if you have any questions regarding the instructions in this manual. If you require additional assistance contact Metra at 800.253.TECH (8324)

SUPPLIED HARDWARE/PARTS:

- 1 pair - MPS-8CSRGB / MPS-8WCSRGB speakers
- 2 Sets - Mounting hardware
- 2 pair - 1.5", 1.75", 1.875" & 2" rubber inserts for MPS-8CSRGB
- 2 pair - 2", 2.25", 2.5" & 2.75" rubber inserts for for MPS-8WCSRGB
- 2 pair - aluminum mounting bands

Roll Cage/Bar fitment:

The MPS-8CSRGB comes with 4 pairs of rubber inserts and 2 pair of Aluminum mounting bands. Mounting system of the MPS-8CSRGB is built to fit 1.5", 1.75", 1.875" & 2" bars. Mounting system of the model MPS-8WCSRGB is built to fit 2", 2.25", 2.5" & 2.75" bars.

* Before installing please measure your bars diameter

Rubber Inserts: Each rubber insert has an intended size molded onto it.

Aluminum Band: The model MPS-8CSRGB has 2 pairs of Aluminum bands in 2 different sizes smaller bands should be used for the 1.5" & 1.75" bars while the bigger bands should be used for 1.875" & 2.0" bars. The model MPS-8WCSRGB has 2 pairs of Aluminum bands in 2 different sizes smaller bands should be used for the 2" & 2.25" bars while the bigger bands should be used for 2.5" & 2.75" bars.

DIMENSIONS:

MOUNTING

Step 1: Remove "Can" speakers from the packaging and ALL hardware

Step 2: Find a GOOD location that allows for easy wiring of the speakers (and LED lights) - PLUS that it does NOT impair your movement around the location.

Step 3: Using a philips head screwdriver, remove the screw that holds the mounting band to the tower speakers.

Step 4: Measure the Roll Cage bar and use the included rubber insert that fits YOUR roll cage bar. Place the rubber insert onto the bar and then clip the band over the rubber insert.

Step 5: Slide the "Can" speaker into the mounting band and line up the mounting hole. Insert the 1/2"(13mm) bolt thru the mounting hole and tighten with a philips screwdriver.

IMPORTANT NOTE:

Blue Loctite is recommended for threaded hardware.

Step 6: Once the location is finalized, tighten the mounting screw with a philips screwdriver.

Step 7: If need be, rotate the speakers for best dispersion. This is easily done by locating the 5/16"(8mm) nuts on the each side of mounting band. Once located release it using a wrench (or philips screwdriver) so that you may rotate the speaker/enclosure to the desired angle. Once there ...lock the nut down.

MOUNTING

IMPORTANT NOTE:

Rotation is limited to 70 Degrees.
DO NOT exceed that range of motion!!

70° Clamp
Rotation

Step 8: Tie-wrap cabling. A very simple solution is to NOT drill a hole in your roll cage bar and simple tie-wrap the speaker/LED wire to the roll bar.

CAN WIRE ROUTING

Some wake towers allow for the wiring to be ran though the tower. Locate the desired location of the speaker, drill a 3/4" hole and route the speaker wire with the attached connector down through the wake tower. Drill a hole at the bottom and then continue to the amplifier for termination. Use a grommet when running any wire thru a metal hole.

RGB / SPEAKER WIRE TERMINATION

Option 1:

MPS-8CSRGB / MPS-8WCSRGB speakers are terminated with a waterproof DIN connector. The pigtail contains a (+) and (-) 16 AWG speaker wire and a female Micro DIN connector for termination of the RGB lighting. Terminate the speaker wires to the speaker wire output on the amplifier. You will need to purchase separately our MPS-RGBC4 controller with (4) male Micro DIN outputs that will control (4) speakers via the Micro DIN connector located on the pigtail. The MPS-RGBC4 is APP driven with the RGB-MPS APP which is available for both IOS and Android.

Option 2:

Terminate the speaker wire to the speaker wire output on the amplifier. Then remove the Micro DIN connector, strip and terminate the internal wiring as follows: DC 12V (+) to the black RGB wire and then pick one set of color combinations listed below.

NOTE: It is possible to "mix" colors WITHOUT using a RGB controller. Follow the chart below to have one constant fixed color(or mix) from your speakers

LED / SPEAKER WIRING CONFIGURATION

BASIC COLOR COMBINATIONS BELOW

- | | |
|-----------------------------------------------------------------|---------------------------------------------------------------------|
| 1) Green Color: Green Wire (Negative)+Black Wire(Positive) | 5) Yellow Color: Red+Green Wire(Negative)+Black Wire(Positive) |
| 2) Red Color: Red Wire(Negative)+Black Wire(Positive) | 6) Cyan Color: Blue+Green Wire(Negative)+Black Wire(Positive) |
| 3) Blue Color: Blue Wire (Negative)+Black Wire(Positive) | 7) White Color: Blue+Green+Red Wire(Negative)+Black Wire(Positive) |
| 4) Purple Color: Red+Blue Wire (Negative)+Black Wire(Positive) | |

SPECIFICATIONS:

MODEL	TYPE	SPECIFICATIONS
MPS-8CSRGB	8.0" Can Speaker	
MPS-8WCSRGB	8.0" Can Speaker	
Power Rating:		200 W MAX / 100 W RMS
Sensitivity:		90 dB @ 1W/1M
MidBass:		8"(203mm) Water-Proof Speaker
Tweeter:		1.0"(19 mm) PEI Tweeter
Nominal Impedance:		4 ohm
Mounting Dimensions (enclosure):		
Length:		11.94"(303.3mm)
Width:		8.58"(218mm)
Height:		11.66"(296.2mm)

INSTALLATION CONSIDERATIONS:

1. Be sure to carefully read and understand the instructions before attempting to install these speakers.
2. For safety, disconnect the negative battery terminal from the battery prior to beginning the installation.
3. For easier assembly, we suggest you have all your tools handy: drill, Allen wrench set, crimps, soldering iron, wire strippers, heat-shrink, etc.
4. Use high quality, waterproof connectors for a reliable installation and to minimize signal or power loss.
5. Think before you drill! Be careful not to cut or drill into gas tanks, fuel lines, brake or hydraulic lines, vacuum lines or electrical wiring when working on any vehicle. If installing in a boat, take care not to cut or drill through the main hull.
6. If possible, do not run wires near fuel lines or power. Running the wires inside the hull area provides the best protection.
7. Avoid running wires over or through sharp edges. Use rubber or plastic grommets to protect any wires routed through metal — especially the tower.
8. Make sure the mounting clamps are tight before leaving the dock or cruising off-road.
