MPS-BTK1 BLUETOOTH® WIRELESS CONTROLLER

 SALES 800-221-0932

MPS-BTK current part is phasing out (End of life)

New **MPS-BTK1** will connect directly to these new 10 pin products

MPS-AMP-EXT
MPS-AMP125-4D
MPS-AMP200-2D
MPS-AMP850-5D

PRODUCT OVERVIEW

Play music and connect to any source using Metra PowerSports Bluetooth wireless receiver. This snap-in Bluetooth wireless receiver is designed to be used in multiple powersports applications including UTVs and watercraft. The MPS-BTK1 receiver fits the standard 1.45" x .83" cutout used for switches by most manufacturers. It features a one-knob control that adjusts all functions including volume, track up and down, source selection, play and pause and pairing. It is equipped with a built-in line driver that triples the voltage input, so the audio sounds great no matter the source. The MPS-BTK1 has a water-proof connector designed to connect directly to the Metra Powersports 10pin DIN amplifiers. A breakout cable is included if connecting to any other amplifier.

- Fits industry standard opening 1.45" x .83"
- Single-knob controls features: track/volume/power/source/play/pause/pairing (patented)
- Complete Bluetooth wireless 4.0 connection
- Connects to music or other sources with any Bluetooth enabled device
- Play music from any media player with 3.5mm auxiliary output
- Built-in line driver for 3x voltage output
- Remembers paired devices and automatically reconnects in connected order when device is present
- Patent-pending single-wire controller for direct connection to a Metra PowerSports Amplifier for complete control (10PIN DIN)
- Universal adapter included for use with other amplifiers
