

OE STYLE AUTO-DIMMING MIRROR WITH BUILT-IN 4.3" MONITOR

TE-AD43 OE STYLE AUTO-DIMMING MIRROR WITH BUILT-IN 4.3" MONITOR

 SALES 386-257-2956

PRODUCT OVERVIEW

Stop straining to see what is in the rearview mirror! iBEAM's OE style auto-dimming mirror with a 4.3" built-in monitor reduces the glare on a bright sunny day or headlights at night. The mirror and monitor automatically adjust based on the lighting environment. Sensors on the front and rear of the mirror adjust the brightness of the mirror and the monitor as they detect weak or strong light sources from headlights, oncoming traffic or sunlight. The mirror has two video inputs for a backup camera and an additional camera view, controlled with a reverse trigger. An optional setting for parking lines can be adjusted in distance and pitch from the included remote. The TE-AD43 can be paired with any of iBEAM's universal cameras for a complete solution.

- Automatic brightness adjustment for mirror and monitor
- OE style auto-dimming mirror
- 4.3" LCD monitor
- 2 video inputs
- Reverse trigger input
- Adjustable parking lines via remote (included)
- Cameras not included
