## TE-CDVR-9QM QUAD CHANNEL TOUCHSCREEN MONITOR WITH DVR

 SALES 800-221-0932

### PRODUCT OVERVIEW

Our iBeam 9" Touchscreen Monitor is the easiest way to view up to four vehicle camera feeds captured on the DVR. The large monitor has 4-Pin DIN inputs to support both audio and video feeds from each camera. It is the ideal solution for eliminating blind spots in commercial vans and large fleet vehicles while recording potentially vital information related to traffic collisions, or other incidents. A simultaneous recording of up to four camera feeds on the DVR can be stored on up to four 256GB microSD cards (sold separately), for ample video storage. The microSD cards are concealed behind a key-locked security door, to prevent tampering with video evidence. A remote control, bracket mount, and removable visor are included for added convenience.

- Bracket mount and removable visor included
- Supports audio and video on each input
- Equipped with RCA audio and video output
- Records up to 4 channels simultaneously
- Accepts up to four 256GB microSD cards behind a key-locked door
- Supports USB backup of video files
- Includes 4-Pin DIN inputs for 4 camera feeds
- Video output for setup and video playback
