

WINDOW MOUNT 720P DVR

TE-DVR-15 iBEAM WINDOW MOUNT 720P DVR

 SALES 386-257-2956

PRODUCT OVERVIEW

Our iBeam window mount 720p DVR is a convenient way to capture potentially vital information related to traffic collisions, or other incidents. The 720p video quality ensures that you will be able to read license plates and street signs clearly - in case video evidence needs to be presented in a court setting, or for insurance purposes. This window mount DVR plugs into a standard 12V outlet, which is universal to most vehicles and can be installed forward or rear-facing. Providing ample storage capability, this DVR supports up to a 32GB microSD card. No need to worry about freeing up space on your SD card by deleting old content, since feed will loop back to the beginning and start recording over the old content once memory card is full. Built-in g-force sensor detects collisions and locks the captured video to prevent it from being overwritten.

- Plugs into standard 12V outlet for operation
- Can be used forward or rear-facing
- Built-in g-force sensor detects collisions and locks the captured video to prevent it from being overwritten
- Device can be switched between video and photography modes
