TE-DVR-DL DUAL LENS 1080P DASHCAM

 SALES 800-221-0932

PRODUCT OVERVIEW

The first iBeam Vehicle Safety Systems® dual lens 1080p dashcam the TE-DVR-DL. The sleek small dual-lens digital video recorder offers one camera for forward facing recording and one camera for recording the interior of the vehicle. This provides both driver and vehicle safety in one unit. You have the ability to record evidence of passenger activities for fun or business, while also being able to record what is happening outside of the vehicle such as in the case of a collision. This is also a desirable device for vehicle fleet owners and other transport vehicles.

The iBeam dashcam plugs directly into a standard 12volt outlet and is capable of recording 1080p with a built in G-force sensor to detect collisions that automatically locks the captured video to prevent it from being overwritten. It is easily mounted and also easily removed from the windshield with a sliding 3M tape mount.

It also has the capability to take a photo with the press of a button. The built-in screen allows for viewing while recording but also can be used to view playback of the recordings. It can also connect via Wi-Fi to an app for viewing.
