

# 360 DEGREE INTERIOR DASH CAMERA WITH REARVIEW CAMERA

## TE-DVR360

# 360 DEGREE INTERIOR DASH CAMERA WITH REARVIEW CAMERA

 SALES 386-257-2956

### PRODUCT OVERVIEW

Record everything going on while driving - both inside and out! Mount the dash camera onto the windshield for a complete 360 degree view from the driver's perspective, including the interior of the vehicle, interior audio recording and snapshot capability. Mount the rearview camera outside of the back of the vehicle for 130 degrees of rear horizontal visuals and backup vision. Ideal for rideshare drivers or those looking for extra assurance from both interior and exterior vehicle video recording. This kit comes complete with a universal mount for any car model, easy installation and a 4" touchscreen for viewing options and video playback. Don't worry about storage management with the loop recording feature that is continually deleting old footage in minute segments to record new footage. All video is recorded and stored with built-in DVR on a MAX 32G Micro SD card. The parking mode feature will activate to record if it senses a shock when your vehicle is turned off and parked, while the built-in collision lock ensures that the video is saved and not overwritten in case of an accident. Owners can feel safe and secure knowing footage is being recorded when they are inside or outside the vehicle.
