IBEAM INFRARED NIGHT VISION DVR

SALES 800-221-0932

PRODUCT OVERVIEW

Our iBeam infrared night vision DVR simultaneously captures video in both the front and rear of the vehicle, and has a built-in g-force sensor to detect collisions which will then lock and protect that data from being overwritten. Drivers gain the added benefit of driving assistance by connecting the DVR video output to their vehicle display. The driver can select to view front day or front night, or rearview for parking. Includes IR LED bar for improved night recording when mounted behind front license plate. This DVR camera kit installs seamlessly to any vehicle while maintaining an OEM factory look.

- Simultaneously captures forward and rear-facing video
- Capable of full 1080 HD forward recording, 720p forward night vision, and 720p rearview visibility
- Built-in g-force sensor detects collisions and locks the captured video to prevent it from being overwritten
- Activate motion sensor to monitor activity while parked vehicle is left unattended
- Includes IR LED bar which mounts to the front bumper to improve night recording
